

DOROTEA-DOMODOSSOLA / GLOBAL HYDRAULICS: ZMĚNY U TLAKOVÉHO SNÍMAČE

OBAVY: Myčky nádobí v provedení Global Hydraulics
 60 cm: PNC 911 4xx 3xx; sériové číslo 351 xxx xx až do / včetně sériového čísla 509 xxx xx
 60 cm: PNC 911 5xx xxx; sériové číslo 339 xxx xx až do / včetně sériového čísla 516 xxx xx
 45 cm: PNC 911 0xx xxx; sériové číslo 340 xxx xx až do / včetně sériového čísla 516 xxx xx

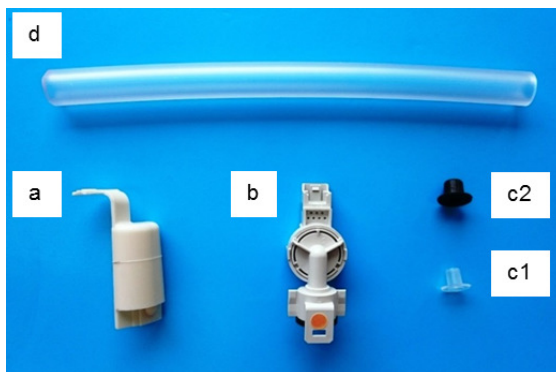

POPIS:

K vyřešení problému týkajícího se stavu tlakového snímače: ucpání, porucha i20, i30, i42... atd., Electrolux připravil náhradní soupravu, která problém řeší pomocí „sifonu“. Je zapotřebí ji instalovat uvnitř jímky a připojit k tlakovému snímači na výpusti jímky. **Nová sada by měla být použita pro opravu a preventivní údržbu.** Preventivní zásah by měl představovat plnou opravu pomocí servisní sady. Nové řešení pomocí „sifonu“ je zamýšleno jako náhrada za všechny předchozí SOUPRAVY tlakového snímače.

Změna není nutná, pokud je sifon již vestavěn do jímky (smontováno z výroby).

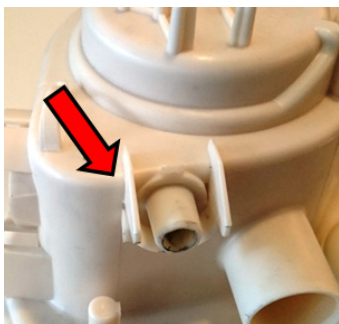

NÁHRADNÍ DÍL ČÍSLO:

Popis	Množství	Pozice	Číslo soupravy
Sifon	1	a	4055346060
Tlakový snímač	1	b	
Průhledné těsnění	1	c1	
Černé těsnění	1	c2	
Hadice tlakového snímače	1	d	

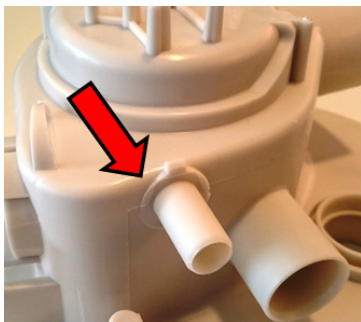

Poznámka:

Při použití soupravy náhradních dílů je nutné sestavit součásti **a**, **a b**. Je rovněž nezbytné odstranit příčník a otevřít tak podstavec. Součásti **c1**, **c2** a **d** musí být použity volitelně. Přiřazení dílů bude provedeno podle vlastností jímky - viz obrázky níže.

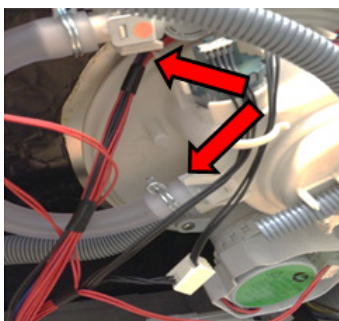

Konektor / tryska **s** konzolou (viz šipka):

Použijte průhledné těsnění**1**

Konektor / tryska **bez** konzoly (viz šipka):

Použijte černé těsnění**2**

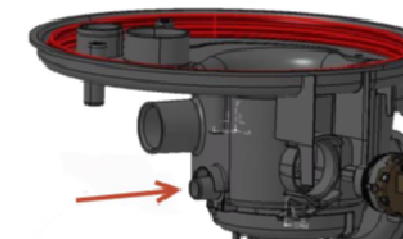

Je-li tlakový snímač připojen k jímce pomocí hadice, pak tato hadice musí být vyměněna – **díl d**

POSTUP:

Montáž soupravy by měla proběhnout následujícím způsobem (je důležité, aby se tlakový snímač montoval jako poslední):

1. Vypusťte z jímky všechnu vodu.
2. Vymontujte starý tlakový snímač.
3. **Důkladně vyčistěte otvor jímky, kam se připojuje tlakový snímač, od nečistot a mastnoty. Použijte měkké materiály – papírové utěrky, hadr, atd. Tvrdé, abrazivní materiály mohou poškodit povrch jímky.**

4. Částečně odšroubujte označený šroub (max. dvě otáčky) na straně, kde bude připevněn sifon. **Použijte k tomu ruční šroubovák.**

5. Vložte těsnění (**c1 nebo c2** - v závislosti na vlastnostech jímky - viz podrobné údaje výše) do otvoru výpusti z jímky, kam se připojuje tlakový snímač. **NEPOUŽÍVEJTE ŽÁDNÉ MAZIVO!**

6. Abyste zabránili poškození těsnění, navlhčete trubku sifonu (a) pomocí prstu namočeného v čisté vodě, který zastrčte celý do otvoru v jímce.

7. Přitiskněte sifon k jímce a držte jej na místě – ujistěte se, že plně přimkne k jímce.
8. Utáhněte šroub jímky.

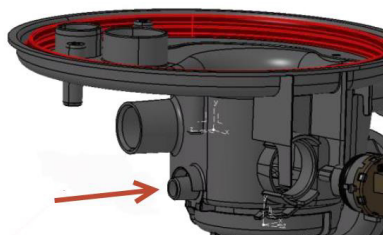

TEST TĚSNOSTI:

1. Do jímky přidejte vodu pomocí sklenice či hrnku až po referenční linii zvýrazněnou na níže uvedeném obrázku. Je-li to možné, také přidejte několik kapek leštidla.

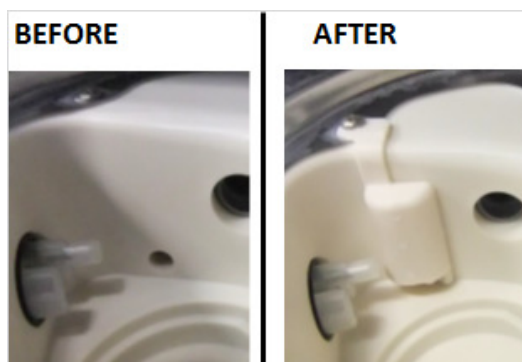

2. Počkejte pět minut, abyste ověřili těsnění a nepřítomnost úniků na výpusti tlakového snímače.

3. Sestavte nový tlakový snímač a připojte kabeláž.

4. Proveďte provozní test, abyste nakalibrovali správné parametry tlakového snímače.
